PROFILE SUMMARY

BCA Student with Specialization in Data Science with skills in Data Analysis, Machine Learning fundamentals, and Database Management. Experienced in Python, SQL, Excel, and Power BI for data cleaning, EDA, ETL, and dashboard creation. Capable of building data pipelines, performing statistical analysis, and extracting actionable insights from datasets.

SKILLS

Programming Languages: Python, SQL, HTML, CSS

Data Analysis & Visualization: Pandas, NumPy, Data Cleaning, EDA, Data Wrangling, KPI Analysis, Statistical Analysis, Excel, Power BI, Matplotlib, Seaborn, Dashboard Development

Database: MySQL(Queries, Joins, Normalization)

Tools & Tech: Jupyter Notebook, VS Code, Git, GitHub, Google Sheets, Postman

EXPERIENCE

INFOTACT Solutions, Data Associate L1

Jun 2025 – Aug 2025 | Remote

- Trained TF-IDF, Word2Vec & BERT models for task classification & priority prediction; improved accuracy 12% via cross-validation & hyperparameter tuning.
- Built recommendation engine & dashboards; increased task relevance 25% and cut analysis time 60%.

Ardent Computech Pvt. Ltd., DATA SCIENCE & ML Intern

May 2025 – Jul 2025 | Remote

- Developed Logistic Regression & Random Forest models (87% accuracy, strong AUC & precision-recall); engineered preprocessing pipelines (Pandas/NumPy) reducing processing time by 70%.
- Visualized 50K+ records with Matplotlib/Seaborn, highlighting top 10 health indicators to guide model development.

PROJECTS

AI-Powered Task Management System

- Automated classification & priority assignment for 50K+ tasks using SVM, Random Forest & XGBoost; boosted workflow efficiency.
- Engineered preprocessing pipelines (Pandas, NumPy); reduced manual cleaning 60%.
- Developed Streamlit dashboard for 20+ users; reduced misclassification 20%, increased adoption 15%.

Personalized Recommendation System

- Built content-based book recommendation engine for 10K+ items & 5K+ profiles; improved precision 15%.
- Optimized feature engineering & similarity metrics; increased retrieval speed 40% and scalable to 20K+ items.
- Enhanced accuracy 15% via vectorization & parameter tuning.

Cricket Score Tracker

- Automated live match data extraction using BeautifulSoup, achieving 99% real-time update accuracy.
- Built a Tkinter interface that reduced navigation effort by 75%.
- Cut match lookup time by 90%, saving ~3 minutes per match.

EDUCATION

Bachelor of Computer Applications (BCA), Arka Jain University
CGPA: 9.6

Aug 2023 – Present | Jamshedpur, India

CERTIFICATES & ACHIEVEMENTS

OneRoadmap Data Analyst Certificate 

GSSoC 2025 – Open Source Contributor

SIH Hackathon: Designed *SanskritiSetu*, a cultural platform reaching 1,000+ users.

Data Analytics & Visualization Job Simulation – Accenture: (May 2025)

Hack Horizon Hackathon: Finalist (April 2025)
